No. 923 of 1881
Cape Coast.

Copy of Despatch from Governor Strahan
Madras dated
Received at Whitehall 20th May 1882

Sir Herbert to the Governor Gold Coast
P. W. D.

Sir

With reference to your letter No. 222 dated 27th December 1881 expressing the hope that the Secretary of State would approve a small annual sum being placed on the Madras Estimates for the purpose of keeping up the Madras Public Works Establishment in the Gold Coast, and calling attention to the fact that no provision has been made for the Establishment in the Madras Estimates for 1882-83, I am directed by the Secretary of State for India in Council to transmit to you the accompanying copy of a Despatch from the Government of Madras No. 47 dated the 2nd instant, and to call specially your attention to the Madras Public Works Memorandum of the 18th May 1882.

2. It is the opinion of the Secretary of State that this is one of the special cases referred to in clause 5 of para 3 of the Proceedings of the Madras Government No. 382 dated 4th October 1881 in which no contribution from the Local Funds of the Gold Coast should at present be made.

3. I am to add that a copy of the despatch under

present in the beginning of the month with the Commissioners and went along the line of the proposed Channel.

4. The Channel first goes through the Harrison Canal. Here if the Dominion Government will give up the canal locks &c. there may be a navigable Channel and I have little doubt that freights altogether there is no difficulty. In place with a good harbour there are no rapids from which to get any Contribution.

5. The Channel next goes through the Lac à Jeannotte, Simonpie and Manouane Lands.

6. The report here said "If you can give us "water to take a second Report if you "can guarantee us a certain depth water "Supply for one Boat we will Contribute "but if we are only to be given water "when there is a freshet in the river, we "don't want it"

7. I am quite to understand the Channel will only run when there is a freshet in the River. When there is no freshet the water is to be retained a little down

Deputy Commissioner's Office
Kaveri District
Fatakal Camp Kadur 3rd December 24

From,

The Deputy Commissioner
Kadur District.

To,

The Chief Secretary
to the Government of Mysore
Bangalore.

Sir,

With reference to your detail
No. 3580 dated 20th September last,
R.D.56.23
calling for a report on the
steps taken to bring the 300 acres
of waterlands of the Mahal Kaval
under irrigation from the new
Cabbagere Channel drawn from
the Anicut across the Yeda. I have
the honor to state that I in
company with the Executive
and the Sub Overseer of the
P.W.D. inspected the whole Channel.
There are 10 outlets at Kadaroor —
from the Channel to supply
water to the lands measuring
in all 6 acres and are situated
within the limits of the
marginally noted
villages. The Channel

1. Cabbagere
2. Anupfihalli
3. Kenchegere
4. Kanchegere
5. Gonnettihalli
6. Chikkacabbagere.

is

is not yet out of the hands of the Public Works Department. The Channel is to be ..... miles long and when it is the whole of it has been cut, it still requires small repairs in places and which are now being done.

2- The Channel for the first two miles runs through the Marshall Kanal and a madavia have been formed there for the flow of the water. The above mentioned villages and it is hoped to irrigate the dry lands of these before supplying water to the canal lands, but judging from the small amount of water passing down the Channel on my inspection, I am extremely doubtful as to whether there will be more than sufficient water for the 1010-6 acres proposed to be irrigated in the present occupied lands.

3- Another point is, that water can only flow down the Channel during a very few months in the year and. Certainly only sufficient for one crop, so the Veda Valla which feeds the Channel

is only full for a very short time and it is only then, or when the ancient sluices——————— that water can be let down this channel. On account of this small depth of water I have charged the rents receiving the water this year a light Rate of 5/- per acre; but I am doubtful as to whether the rents will even accept this small Rate as a permanent one. I however explained to them that should they not accept these rates, the present existing Swadavois would be removed and the Ranchalli Canal irrigated by this means It remains to be seen however whether the rents will accept these rates as the permanent settlement and which will be carried out after the Channel has been handed over; but I am convinced that no more than 4000-6 acres now proposed can be irrigated by this Channel.

4. Under the circumstances no further steps need be taken at

at present to acquire this land at
for irrigation purposes.

5. I may mention that numerous
applications have been received
for this land, principally
under the understanding that
if sold receive water, and will
be dealt with when the question
of supply of water is finally
settled.

I have the honor to be,

Sir,

Your most obedient servant,

Wm Sparks

Deputy Surveyor General

Kadina Division
